

Sohum Bhatnagar

Product & Interaction Designer

Bengaluru, India · 9606717552 · sohum1311@gmail.com · sohumsite.vercel.app · LinkedIn

PROFILE

I design digital products, from the first rough flow to the finished interaction. My background is in animation, which means I think about how interfaces move and feel, not just how they look at rest. I work across research, interaction design, visual design, and prototyping, and I am comfortable taking a vague problem and building it into something testable before anyone writes a spec. I use AI to move faster and explore further, but it is a tool in the process rather than the point of it.

CORE SKILLS

Design Product Design · Interaction Design · Design Systems · Design-to-Code · Rapid Prototyping · Visual Design · Information Architecture · 3D Hard-Surface Modeling

Tools Figma · Claude · ChatGPT · Photoshop · Blender · Maya · ZBrush · Substance Painter · Unreal Engine 5

EXPERIENCE

UI Designer

Sep 2025 – May 2026

Bob Rides · Freelance

- Designed a 3D icon system from scratch for the vehicle selection interface, maintaining consistency across dark and light modes and establishing a visual language that distinguished the product.
- Used Claude and Figma Make to build an AI-assisted design workflow, reducing iteration cycles from days to hours and delivering production-ready assets faster than a traditional process would allow.

3D Modeler Intern

6 months

University of California, Riverside · Dept. of Paleontology

- Produced scientifically accurate 3D fossil models in Blender and ZBrush for international research publications and educational media.
- Worked remotely in a deadline-driven international environment with high output expectations and minimal direction.

3D Generalist (Freelance & Personal Projects)

2024 – Jun 2025

Independent

- Hard-surface modeling and texturing in Maya and Substance Painter for game and commercial assets.
- Built PBR-textured modular environments in Unreal Engine 5, developing spatial composition instincts that directly inform how I approach UI layout and hierarchy.

SELECTED PROJECTS

Bob Rides — Designed the end-to-end product experience for a live ride-hailing platform, including a custom 3D icon system and a cohesive product design language.

UUCMS — Redesigned a university management portal, improving information architecture and simplifying core academic workflows.

REWIND — Designed and built a hardware-inspired browser music experience exploring tactile interaction using the Web Audio API.

EDUCATION

Bachelor of Visual Arts (Animation)
Chitrakala Parishath, Bengaluru · 2021–2025

Graduated with Distinction

Class XII · Delhi Public School · 2021
